

# Sina Sadeghian

## Art & Creative Video Director

22 September 1995

I've always been a curious, multidimensional learner who also turned out to be a capable engineer. But it was my mix of passion, talent, and a hint of boldness that helped me find the right path. Creativity and communication are my strongest assets, and they've played a key role throughout my career. Combined with my experience and technical skills, I've become a practical problem-solver with a strong ability to turn ideas into reality. I recently relocated to the Netherlands and have full work authorization.
